AKALI Invisible Wiper Hydrophobic Nano Coating for Automotive Windshield

Hydrophobic Nano Coating for Automotive Windshield is made by a new generation of nanotechnology and special chemical formulation to emulate lotus surface structure to protect glass surface. It has a hydrophobic, stain resistant, transparent, breathable, and long time effect properties. After handling of nano particle modification and special nano process, It

is not only a hydrophobic, antifouling, and easy clean surface protection coating but also an invisible wiper for automotive windshield.

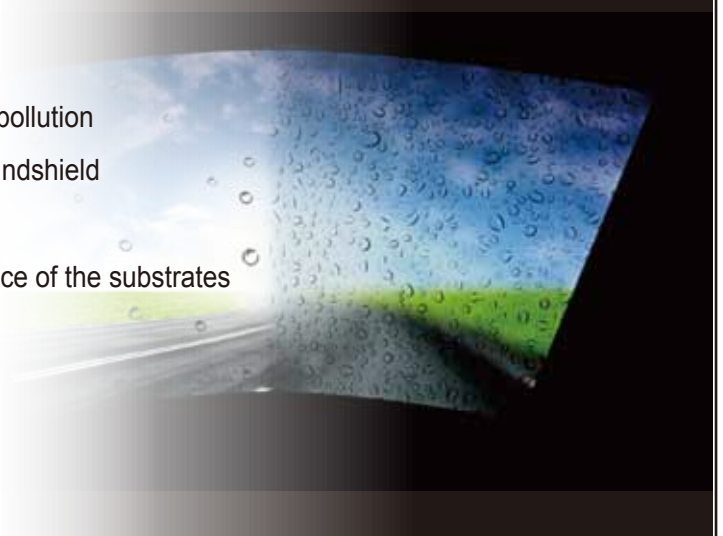

Hydrophobic Oleophobic Easy Clean Eco Friendly Long Time Effect

AKALI

Product main features

- Strong hydrophobic and oleophobic properties
- Excellent easy clean effect regarding deposits of air pollution
- It can be used as an invisible wiper for automotive windshield
- Strong non-stick property
- High transparency and no influence on the appearance of the substrates
- High temperature resistance and Anti-UV
- Easy for coating. Hardening at room temperature
- Long term effect – longevity
- Green and Eco
